redblock.

Automation is AI's primary job to be done for Cybersecurity. The network is no longer the perimeter, and firewalls can no longer protect devices or servers. Even a locked-down identity isn't enough to defend against today's adversaries, who are always one step ahead. They have the same–if not better–tools as we do and only need to be right once. Our speed is the key to protecting our critical IT/OT

Sprinto

STELLAR CYBER®

Stellar Cyber's Automation-driven Security Operations Platform, including NG-SIEM and NDR and powered by Open XDR, delivers comprehensive, unified cybersecurity without complexity. It empowers lean security teams of any skill level to secure their environments successfully. As part of this unified platform, Stellar Cyber's Multi-Layer AI™ enables enterprises, MSSPs, and MSPs to reduce risk with early and precise threat identification and remediation while slashing costs, retaining investments in existing tools, and improving analyst productivity. This results in a 20X improvement in MTTD and an 8X improvement in MTTR. The company is based in Silicon Valley. For more information, visit https://

SYMMETRY SYSTEMS

Our Vision: Unprecedented Data Transparency
We believe that Respect for Data is the cornerstone of progress. In an increasingly AI-powered digital world, Data should be treated with the respect it deserves, and that starts with privacy and security. Not just security of the infrastructure on which that is stored, but into every permission and operation performed on that data. Only with this fine grained visibility and control, can organizations innovate with confidence and avoid trampling over individual's privacy and data rights.

Spend more time with our speakers and our Careers and HR Management team. Meet Jeremy Hein, Robynne Templin (Box), and Blake Allen

CHAPTER
EAST BAY

Metrics for 2024 at the year-end clean up

Purged – 62 member accounts showed no activity in three years. We have 30 nonfunctioning email addresses.

Keep-ask: 294 Members need to fill out their member form. Past Speakers, sponsors, and people who remain active in our online community but have yet to attend and earn ISC2 East Bay delivered CPE in the three-year cycle. We need affirmation to continue communications and invitations to speak at events.

Active ask: 299 active members must update their member form.

ACTIVE: 207 members have been attending and have an up-to-date membership form

Moving to a model of Active Member v. Guest

The ISC2 East Bay Chapter is moving to a model of Active Member in Good Standing v. Guest to better support the operations of physical space and food management and to purchase scholarship and training materials.

The small annual fee, $45, goes towards discounts and preferred access to for-pay events. Member guests may still use early bird incentives but will pay full rates to register and attend our conferences.

This change is less about increasing our revenue than it is about managing continuous spending for planned activities.

We also use this money to offset our policy of waiving fees for full-time students.

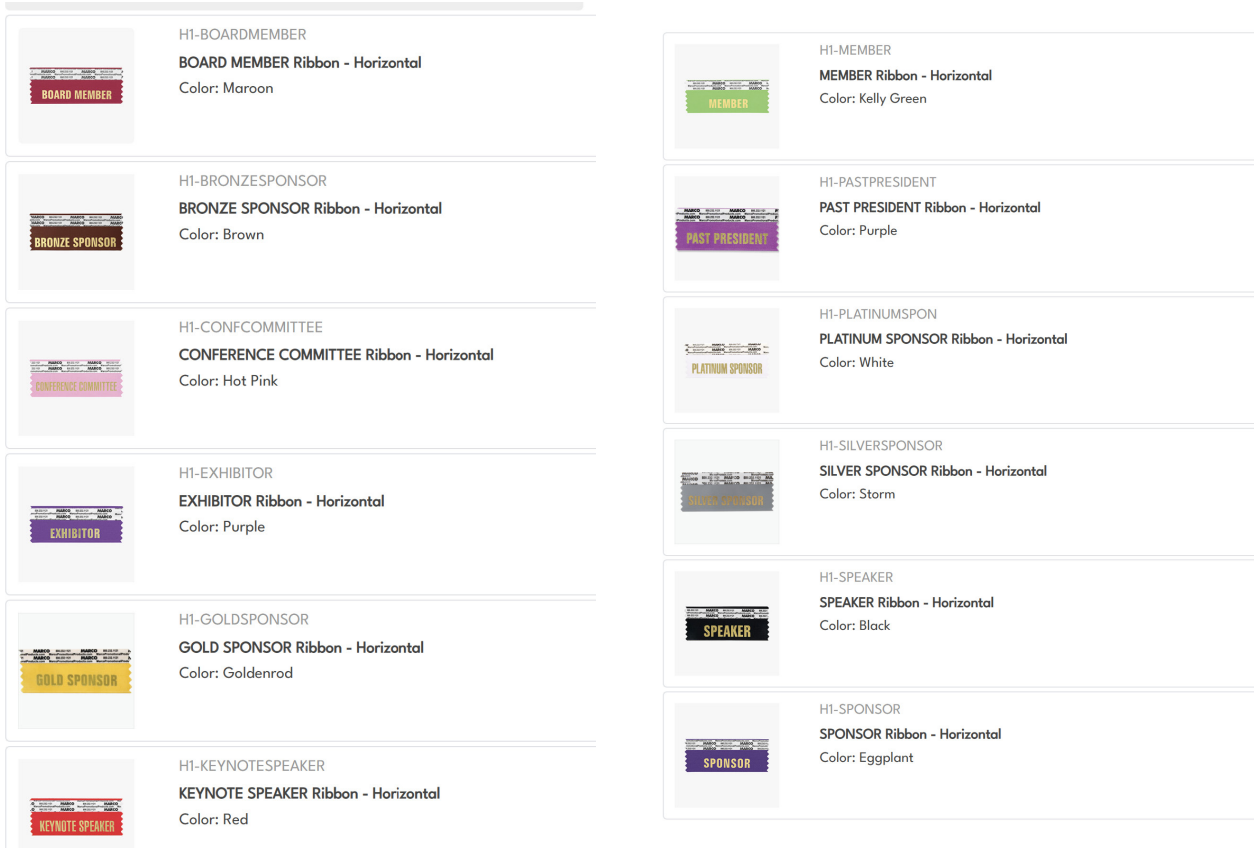
Member Records Benefit

Our member benefits include investing in sharing who you are in a closed and secure community.

People meeting you at our conferences know your title, history, and accomplishments are fairly represented.

Hiring managers are more likely to trust you as a candidate.

Business prospects are more likely to trust you when making follow-up appointments.



Thank you!
