A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

PANEL MODERATOR

Sean Cordero

Chief AI Security Officer | Cyera

PANELISTS

Aimei Wei
Co-founder & CTO
Stellar Cyber

Ana Colocho
Executive Director,
Cryptographic Controls
JPMorganChase

Eddie Borrero
Data & AI Security Officer
Cyera

Indus Khaitan
Founder & CEO
Redblock

Shashwat Sehgal
Founder & CEO
P0 Security

Subbu Rama
CEO & Co-founder
BalkanID

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

PANELIST

Shashwat Sehgal

Founder & CEO | P0 Security

Shashwat is rethinking privileged access management for production systems. His work at P0 Security focuses on giving people, workloads, and AI agents just enough access, only when they need it. At Splunk he led OpenTelemetry initiatives, and at Cisco Meraki he applied machine learning to network troubleshooting.

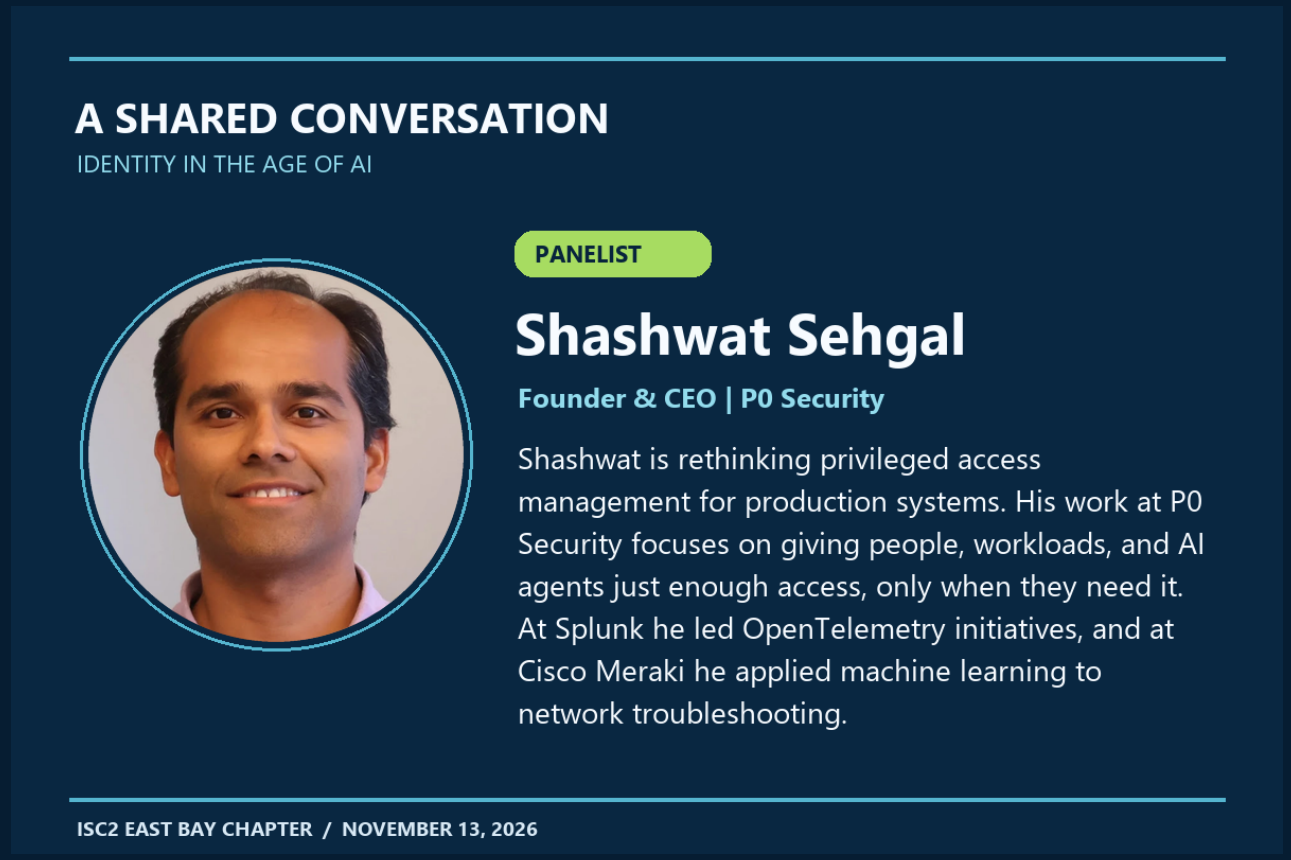

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

OPENING QUESTION

How would you grant an agent enough privilege to issue one credit without giving it standing authority to credit any account?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

FOLLOW-UP QUESTION

Where would you put the last enforceable checkpoint before the credit posts, and what would make it stop the action or ask for approval?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

PANELIST

Aimei Wei

Co-founder & CTO | Stellar Cyber

Aimei has more than 20 years of experience building products and leading teams in networking and telecommunications. Before co-founding Stellar Cyber, she developed software-defined networking solutions at Cisco.

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

OPENING QUESTION

If each step in an agent's workflow looks legitimate on its own, what would a security operations team need to see to recognize that the overall run is going wrong?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

FOLLOW-UP QUESTION

If you could add one piece of context to an agent's activity logs tomorrow, what would most help an analyst decide whether to intervene?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

PANELIST

Indus Khaitan

Founder & CEO | Redblock

Indus leads Redblock, which extends identity security to disconnected applications. He previously co-founded Bitzer Mobile, a mobile security company acquired by Oracle.

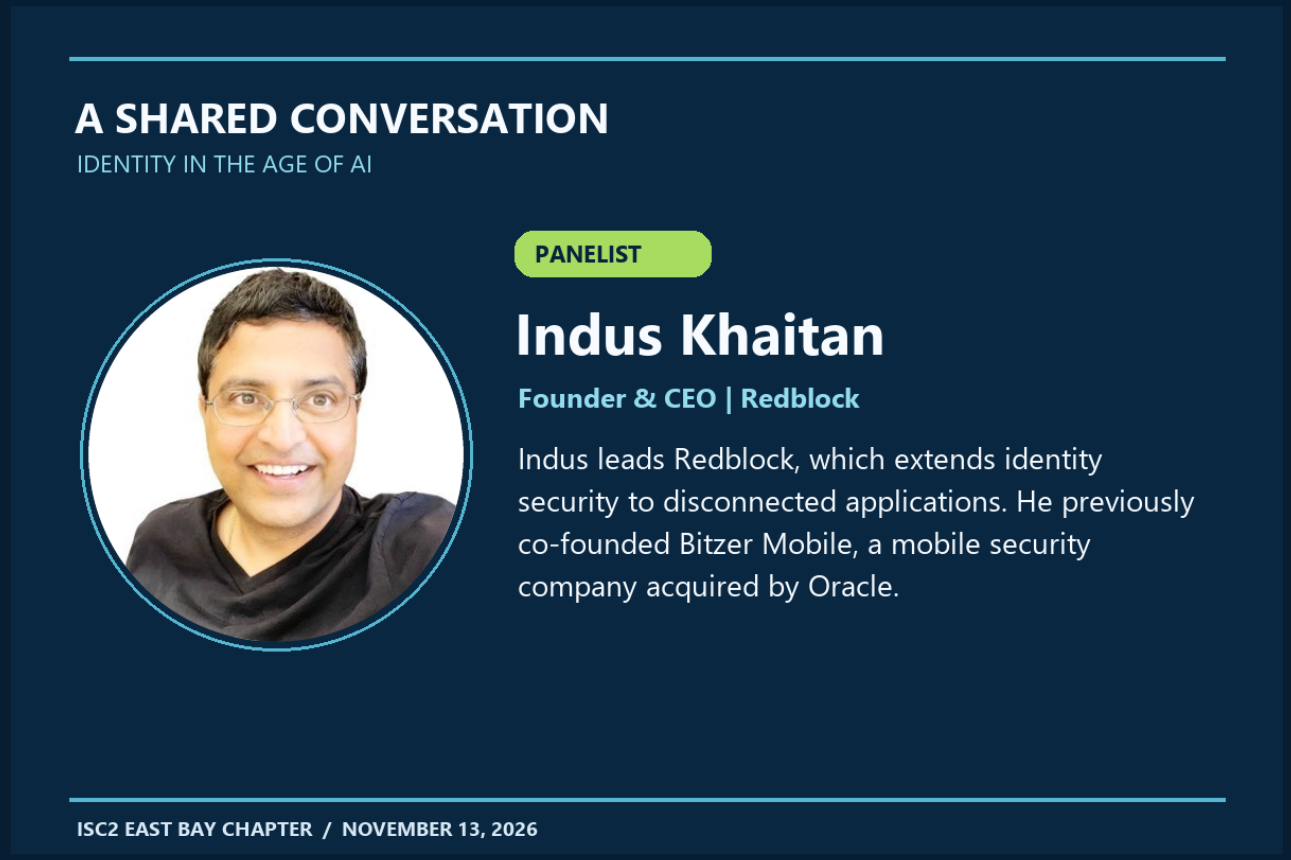

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

OPENING QUESTION

Where would you look first for an agent's access to apps that sit outside the central identity platform?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

FOLLOW-UP QUESTION

If an app can’t issue short-lived credentials or enforce permissions for a single case, what would make you comfortable connecting it to an agent?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

IDENTITY IN THE AGE OF AI

PANELIST

Subbu Rama

CEO & Co-founder | BalkanID

Subbu leads BalkanID, which specializes in identity security and access governance. A three-time founder with experience in infrastructure, AI, cybersecurity, and cloud computing, he previously co-founded Bitfusion, which VMware acquired.

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

OPENING QUESTION

How would you show what an agent can actually reach once you account for nested groups, delegated permissions, and the identities its tools use?

A SHARED CONVERSATION

PANELIST

Subbu Rama

CEO & Co-founder | BalkanID

Subbu leads BalkanID, which specializes in identity security and access governance. A three-time founder with experience in infrastructure, AI, cybersecurity, and cloud computing, he previously co-founded Bitfusion, which VMware acquired.

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

FOLLOW-UP QUESTION

Which combination of access rights would you flag first as dangerous, even if each grant was approved individually?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

OPENING QUESTION

In the card-dispute example, how would you give an agent access to one customer's records while keeping other customers' data out of reach?

A SHARED CONVERSATION

IDENTITY IN THE AGE OF AI

FOLLOW-UP QUESTION

After an agent posts a credit, what evidence would you want to verify which identity acted, on whose behalf, and under what authority?

A SHARED CONVERSATION

PANELIST

Eddie Borrero

Data & AI Security Officer | Cyera

Eddie has more than 25 years of experience in digital transformation, enterprise risk, and AI governance. He spent more than two decades as a CISO and advises boards and CEOs on AI regulation and continuous risk management.

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

OPENING QUESTION

Before an agent can read customer data, issue credits, and send messages, what evidence should leadership require before approving it for production?

ISC2 EAST BAY CHAPTER / NOVEMBER 13, 2026

FOLLOW-UP QUESTION

If that agent later gains a new tool or data feed, what change should trigger a fresh approval, and who should own that decision?
